Using this information, walk off the length and width of your house outside to determine those approximate distances. Then multiply the length of your house by the width of your house to find the square footage of your home. Inside your house, use the same technique in each room to calculate the square footage of the individual rooms. Add the square footage of the individual rooms together and compare this total with your overall square footage calculated earlier. Were they the same, or was there one larger than the other. Why? Write your answers on a separate sheet of paper.</p>
